

# R-PET bicolor

**Double color,  
double beauty.**

100% SUSTAINABLE

The GLUE-LESS™ patented technology is the result of an international partnership between ROBOPLAST Srl, leader in extrusion and thermoforming of plastic films, and B4H SA, holding company inspired by innovation.

The R-PET Bicolored, GLUE-LESS™ laminated, film solves several weaknesses in conventional technologies:

### Top in thermoforming

- Homogeneous film, completely amorphous
- Incredible flexibility in process temperatures
- No delamination in depth thermoforming (>100 mm)
- Best product details response on molding

### Top in customization

- Color, thickness and width
- Washable and reusable on demand

### Top in recycling

- Mono-material structure
- Fully recycled and recyclable

100% Recycled  
100% Recyclable

100% Washable  
100% Reusable

100% Eco-Friendly  
100% Sustainable
